

# 8 Reasons to adopt Anuta ATOM Cloud

Align your network automation strategy to your cloud strategy by embracing Anuta Networks SaaS offering - the **ATOM Cloud**, purpose-built to accelerate your network evolution.

Now bring the agility to your  
Network Transformation with no boundaries!

## 1 Network Automation as a Service:

A single-pane-of-glass experience by integrating configuration & compliance management, workflow automation, service orchestration, monitoring & alerting straight from the cloud.

## 2 Faster time to value and ease of implementation :

Rapid value realization by getting started quickly by utilizing the out-of-box use cases without any hassles of software deployment.

## 3 Scale as you grow :

Planning to increase your network footprint? ATOM Cloud has you covered - An application that can scale up or down dynamically based on requirements.

## 4 Reduce Total Cost of Ownership :

Eliminate the hardware, support, and maintenance costs involved in on-prem solutions through ATOM Cloud's flexible subscription models.

## 5 Immediate access to innovation :

Add more value to your subscription by accessing the latest & greatest version. Get the latest device support, service models, workflows, and compliance policies as soon as they are available.

## 6 Access to industry benchmark & best practices :

Get instant recommendations through crowdsourced analytics that help you adopt industry best practices.

## 7 Effective security to protect your data :

ATOM Cloud is SOC2 compliant and offers best-in-class security to your data at rest and in transit. It employs measures to backup, recover, and restore to prevent data loss in the event of failures.

## 8 Ability to try before you buy :
